"Defining the Leading Edge in Technology and Economy Worldwide"®

 **BACHMANN**

Installation Support & Supervision

Bachmann Industries stands ready to assist plants as a trusted partner for responsive customer service for **installations around the world.**

Whether it is for installation support for Bachmann supplied equipment or some other manufacturer's equipment, **Bachmann's Field Service Team** is ready and willing to assist.

Experienced in installing equipment in even the most demanding applications and environments, Bachmann's full time support team is trained to efficiently provide able assistance in assembly, installation and commissioning of all related equipment in Bachmann's product line up:

- Dampers of all types
- Metal and fabric expansion joints
- Ducting, stacks & silencers

Bachmann's expertise spans across various industries including:

- Power
- Petrochemical and Refining
- Steel & Copper
- Cement
- Pulp & Paper
- Biomass / Waste to Energy

Preventative Maintenance Inspections

Bachmann technicians travel worldwide working on equipment at power plants, refineries, paper mills and other industrial facilities. As such, Bachmann Industries is uniquely qualified to be the single source provider for a wide range of **plant services and maintenance.**

Offering hands-on system walk-downs and evaluations of all types of power and industrial plants, Bachmann's field service technicians specialize in objective, unbiased surveys on combustion systems, exhaust duct systems and associated components. Typical surveys are:

- Problem Solving/Troubleshooting
- Specification Development
- Efficiency Surveys
- Maintenance Surveys
- General Plant Survey

Refurbishment & Modernization

In today's competitive market, Bachmann professionals understand that plants and facilities need to operate nearly nonstop. **Damper and expansion joint reliability and performance are essential.**

Recognizing tight operating and maintenance budgets call for innovative solutions from product to operational know-how, Bachmann engineers have developed many solutions from complete damper and expansion joint replacements to damper and expansion joint 'parts kits' which retrofit into existing ducts or stacks during short outage windows. Let our engineers and technicians help you **bring your facility's damper and expansion joint equipment to a new operating level**, meeting today's demanding reliability expectations.

Aftermarket Replacement Parts

Bachmann Industries offers a wide variety of replacement parts and solutions.

Bachmann has supplied equipment all around the world for nearly 50 years, developing extremely simple, cost effective solutions for refurbishment of all brands, styles and designs of dampers and expansion joints.

From complete damper replacement to rebuild kits, Bachmann has your ideal solution to improve plant efficiency and reduce downtime and outages.

Bachmann engineers and technicians have the tools and ability to design and supply spare or replacement parts for equipment supplied by all major manufacturers of dampers and expansion joints.

Excellence with Experience,
from Design to Installation and Operation
